Hydraulic Pressure Calibrator for Industrial Use – HPC700L

Serrax Technologies

Product Overview

The Serrax HPC700L Pressure Pump is a high-performance hydraulic pressure generation unit designed for precision calibration and pressure testing applications.

- Pressure Range: 0 to 700 bar
- Compact & Portable Design
- Heavy-Duty Industrial Construction
- Dual Input Ports
- Smooth & Accurate Pressure Output

SERRAX

Key Features

- Model: HPC700L Hydraulic Pressure Pump
- Pressure Range: 0 to 700 bar
- Type: Hydraulic Pressure Generation
- Dual Input Ports
- Heavy-Duty Industrial Construction
- Approx. Weight: 7 kg
- Compact Size: 350 × 300 × 100 mm
- Designed for High-Pressure Calibration Applications

SERRAX

Applications

- Calibration Laboratories
- Industrial Maintenance Teams
- Pressure Testing Applications
- Workshops & Field Operations
- Instrumentation Calibration

SERRAX

Reliable High-Pressure Calibration Solution

The HPC700L delivers reliable and stable hydraulic pressure generation for industrial calibration and testing environments.
